***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "reading head" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-13, 15 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8, lines 6-7, it is not clear as to what is being defined by "at least one moving distribution head providing at least one reading head". How does a distribution head provide a reading head? It is not clear as to what is being defined by "providing"? The specification is not clear as to how the distribution head is provided with a reading head. Line 8, it is not clear as to what is being defined by "distribution tubes associated to the moving distribution head". How are distribution tubes associated to the moving distribution head? It is not clear as to what is being defined by "associated to..."? Line 14, it is not clear as to what is being defined by "based upon a reading of the identification label". By which element is a reading performed?

Claim 11, lines 2-3, "the distribution tubes of the moving distribution head" lacks appropriate antecedent basis within the claim. It is therefore, not clear as to what "the distribution tubes of the moving distribution head" serves to define.

Claim 15, lines 8-9, it is not clear as to what is being defined by "the moving distribution head attaches to the plurality of distribution tubes". Is the language of lines 8-9 directed to a procedural step? Otherwise, the specification does not appear clear and complete as to how "the moving distribution head attaches to the plurality of distribution

tubes". Lines 16-17, it is not clear as to what is being identified by "such that the moving distribution head can select..." or "for positioning the distribution tube whose diameter corresponds to the diameter of the parts..." It is not clear from the language of lines 16-18 as to what "the moving distribution tube can select". Or, it is not clear as to what element is "for positioning the distribution tube".

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
